STATE OF ART HEARING DEVICE CENTER OPENS IN SANTA ROSA

California Ear Institute brings premier hearing-related services to Santa Rosa

SANTA ROSA, CA, NOVEMBER 28, 2007 – Leading provider of hearing-related services California Ear Institute at Santa Rosa opens hearing device center in December 2007, making available for the first time the best in hearing-impairment device technologies. Expert Audiologist Christy Cooper, Au.D. will manage operations in the North Bay location.

Founded in 1968 as the first practice dedicated specifically to hearing healthcare, CEI has since provided over a quarter million visits to patients worldwide. Surgeons and audiologists treat hearing and balance disorders with innovative modalities, including assistive and surgically implantable hearing devices and cochlear implants.

Effective January 1, 2008, California Assembly Bill 2651 requires all infants receive hearing screening tests before leaving the hospital, and will add an average of 120,000 infants to public record per year. CEI's new center is uniquely qualified to treat the hearing-impaired percentage of this population.

CEI offices are located throughout the great Bay Area in East Palo Alto, San Ramon, and Santa Rosa. Each location is open five days a week.
